## Scam: Safeguard

### **₹122 Crore Bank Fraud Rocks India – Depositors in Crisis!**

The New India Cooperative Bank Scam is a ₹122 crore financial fraud that has shaken the banking sector. It was orchestrated by Hitesh Mehta, the bank's former General Manager, who illegally withdrew funds and invested them in fraudulent schemes. Rajiv Ranjan Pandey was also arrested for misusing ₹15 crore meant for Corporate Social Responsibility (CSR) projects to fund a hotel business. The scam deceived investors by promising unrealistic returns of 50%, leading to massive financial losses. In response, the Reserve Bank of India (RBI) imposed strict restrictions, including a six-month withdrawal freeze, a ban on new loans, and later, a relief measure allowing depositors to withdraw ₹25,000. Meanwhile, the Economic Offences Wing (EOW) is investigating, with reports suggesting that RBI officials may also be questioned for possible lapses in oversight. The case has highlighted serious weaknesses in banking regulations, emphasizing the urgent need for tighter security measures, stricter financial monitoring, and better governance to prevent such scams in the future.

## STORY TIME

### SUNITA WILLIAMS' UNEXPECTED SPACE ODYSSEY

What started as a simple week-long mission turned into an unexpected nine-month adventure for astronaut Sunita Williams. A glitch with Boeing's Starliner left her and fellow astronaut Butch Wilmore stuck aboard the ISS, facing the challenges of long-term space travel. Muscle loss, balance issues, and even faster graying were just some of the effects she endured—giving NASA plenty of new data on how space changes the human body. But true to her nature, Williams took it all in stride. She exercised, ran a marathon in zero gravity, and kept her spirits high, proving why she's one of NASA's best.

As the months ticked by, the world watched closely, cheering her on from millions of miles away. News headlines tracked every update, space fans speculated, and NASA worked nonstop to bring her home safely. When she finally landed, it was a victory not just for her, but for everyone who had followed her journey. Still, one big question remains—what will NASA learn from this unexpected detour?
